Banner
Custom size

Tailor-made banners for different occasions but a variety of suspension options. We offer several different materials with specific properties that are good for different conditions, such as facades, fences, walls and wind protection. Here are the most common banner materials we produce.

Options	Eyelets, Keder list, wooden pole, Velcro

Frontlite: Fire-rated smooth banner. With high UV resistance requirements, this banner is durable and weather-resistant, making it ideal for outdoor use.

Mesh: Banner material made of perforated mesh fabric. Perfect for buildings, fences, and exposed areas where air permeability is crucial. Fire-rated with high UV resistance requirements. Suitable for both temporary and long-term use.

PVC fri NonWoven: Pressed textile in 150 g Polyester. Suitable as fence banners or pallet covers. It's durable and can withstand water and exposed environments. Use for events or construction sites where you want to create a border around an area.

The GREEN alternative

Fairlyn Mesh®: An environmentally friendly alternative to PVC banners that has the same good quality and function. Made of 100% polyester without toxic solvents and heavy metals. Stronger and more elastic than PVC Mesh and better suited for colder climates because it does not stiffen and crack as easily from the cold.

Stronger and more elastic than PVC Mesh.
Weight reduced by 30%. Fast installation and less damage to the facade.

Material	3–5 m^2	5–25 m^2	25-100 m^2
Banderoll, Frontlite Standard	35,2 €	26,4 €	23,8 €
Banderoll, Mesh Standard	35,2 €	26,4 €	23,8 €
Banderoll, Fairlyn Mesh	49,6 €	37,2 €	33,5 €
Banderoll, Non Woven	35,2 €	21,1 €	19,0 €

Finishing

There are various suspension solutions when you are going to mount banners. As a standard, our banners come with edge reinforcement and eyelets every 50 centimeters.
Other hanging solutions include sewn channels for aluminum or wooden rods. Keder is a good alternative for exposed locations. Installation with keder requires a keder profile to be mounted on the wall.

Standard finishing of banners included in the m^2 price

Edge reinforcement

Double-folded material welded to a sturdy edge.

Eyelet

In standard finishing, an eyelet is included every 50 centimeters.

Common suspension solutions to choose from at extra cost

Keder

Diameter: 7,5 mm
Length: Custom

Channel

Sewn channel at top and bottom for mounting and suspension with rod.
