

# Flextile

80 | 100 | 120

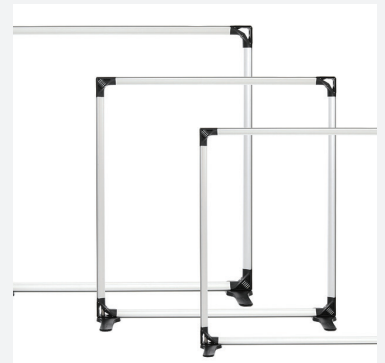

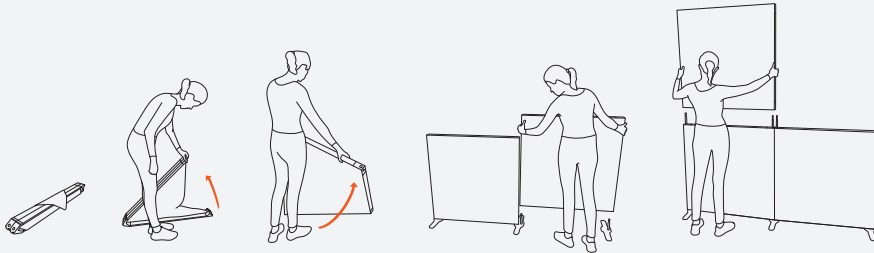

A revolutionary portable modular system! Multiple patents and awards for design and engineering. The Flextile frames can be folded and unfolded with the printed fabric mounted on the frame. Once the graphic is installed you never have to remove it or reinstall it again! Stack vertically and connect horizontally, simple and intuitive but very capable. Build everything from a simple tabletop, to a larger backwall, to towers, to counters, to larger spaces. Each carry bag can hold up to 4 frames, 4 connector rods, 4 foot rods, and 1 top connector.

Covered by Spennare's Lifetime Warranty.

## Multiple options

Using the same amount of frames you can alter your Flextile in the best way suitable for a specific event and provided space. Create different configurations and combinations, a straight back wall can also convert to multiple tabletops, or separate displays and a tower.

Flextile is the ultimate solution for messaging flexibility since you can choose between below options for printed graphics.

### One graphic per frame

The easiest set up. The graphics are already installed in the frames. Assemble a small display in just a few minutes.

### One graphic over several frames

A larger graphic that spans across multiple frames, front only or double sided. The SEG graphic inserts easily into the grooves of the frames.

### Double sided pillow case

The pillow case graphic pulls over the Flextile display using a stretch fabric. No more rounded corners, no more pile of aluminum pipes. A pillow case display made simpler and better.

## The greatness of Flextile – countless configurations

With the same number of frames, there are several possibilities. Here you see a selection of configurations you can build. The size and floor space required depend not only on the number of frames but also on the frame size you start with. On [spennare.com](https://spennare.com), you can find even more possible configurations. There, you can also create sketches with your own artwork on the wall.
